Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Beryllium Rocket Motor Fuel Firing were promulgated on April 6, 1973 (38 FR 8826), and amended on both October 17, 2000 (65 FR 62151) and February 27, 2014 (79 FR 11275). These regulations apply to existing and new buildings, structures, facilities, or installations where the static test firing of a beryllium rocket motor and/or the disposal of beryllium propellant is conducted. New facilities include those that commenced construction or reconstruction after the date of promulgation. This information is being collected to assure compliance with 40 CFR Part 61, Subpart D.

Form Numbers: None.

Respondents/affected entities: Beryllium rocket motor fuel firing test sites.

Respondent's obligation to respond: Mandatory (40 CFR Part 61, Subpart D).

Estimated number of respondents: 1 (total).

Frequency of response: Annually.

Total estimated burden: 9 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,110 (per year), which includes \$0 for annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: 1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and 2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup and/or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Regulatory Support Division.
